The BBSB program

The graduate program in Biochemistry, Biophysics, & Structural Biology provides outstanding graduate training in a highly collaborative research environment. Students and faculty are engaged by a plethora of biological questions, employing creative approaches to seek detailed, mechanistic answers. The program includes such diverse topics as host-pathogen interactions, cancer-related biochemical pathways, membrane protein function, and nucleic acid metabolism.

Learn about the exciting and collaborative research done in the program from both faculty and students.

Find out what it is like to live in Saint Louis, the different student groups on campus, and what it's like to be a PhD student at WashU.

INTRODUCTION TO THE PROGRAM
1:00 - 1:30pm
